Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group 1: Claims 1-11, drawn to a method of making compounds of formula I; classified in class 544, various subclasses depending on substituents. Election of species will be required if this group is elected.

Group 2: Claims 12-17, drawn to a method of making compounds of formula 23; classified in class 544, various subclasses depending on substituents. Election of species will be required if this group is elected.

Group 3: Claims 18-29, drawn to a method of making compounds of formula 29; classified in class 544, various subclasses depending on substituents. Election of species will be required if this group is elected.

Group 4: Claims 30-33, drawn to a method of making compounds of formula 46; classified in class 544, various subclasses depending on substituents. Election of species will be required if this group is elected.

Group 5: Claims 34-44, drawn to a method of making compounds of formula 47; classified in class 544, various subclasses depending on substituents. Election of species will be required if this group is elected.

Group 6: Claims 45-51, drawn to a method of making compounds of formula 48; classified in class 544, various subclasses depending on substituents. Election of species will be required if this group is elected.

Group 7: Claim 52, drawn to compounds of formula 49; classified in class 544, various subclasses depending on substituents. Further restriction and election of species will be required if this group is elected.

Group 8: Claims 53-55, drawn to compounds of formula 45; classified in class 544, various subclasses depending on substituents. Further restriction and election of species will be required if this group is elected.

Inventions of Groups 1-8 are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are distinct processes of making compounds of various formulae, namely, formula 1, formula 23, formula 29, and formulae 45-49. Although the formulae appear in the same class, each process has different starting materials and reaction conditions. Besides, each formula has a different set of substituents which contributes to the novelty of said process.

Thus, a reference anticipated or rendered obvious compounds of one group would not do so to those of other groups. Therefore, a separate search is required for each group. Note, a preliminary search in EAST yields a total of 3,346 hits, which clearly shows an overwhelming number of references for consideration.

Because these inventions are independent or distinct for the reasons given above and the search as well as examination for the 8 distinct inventions would indeed impose a serious burden on the examiner in charge of this invention (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Due to the complexity of the grouping, the restriction is presented in writing. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tamthom N. Truong whose telephone number is 571-272-0676. The examiner can normally be reached on M-F (9:30-6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James O. Wilson can be reached on 571-272-0661. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 1624

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
